STREET MAINTENANCE FOR ENTIRE CITY

WHAT/WHEN: Crack seal work will be starting up on various streets in the City of Cincinnati beginning March 25, 2002, weather permitting. Crews will be applying crack seal material to streets located throughout the entire city, and the crack seal program will restrict parking on these streets. "No Parking" restrictions will be posted the day before work begins (weather permitting, these restrictions will only be posted for one day for each street segment). On major routes, at least one lane will be open to traffic in each direction.

WHERE: Several hundred streets located throughout the City of Cincinnati. The Department of Transportation and Engineering oversees the renovation of streets in the City of Cincinnati. The Department is also responsible for transportation planning, design, engineering services, structural and geotechnical services, right of way regulation and construction management. It is the clearinghouse for all City and regional transportation functions, including serving as a liaison to the Southwest Ohio Regional Transit Authority.

For more information about our department, or to contact our program managers to offer suggestions or comments visit www.rcc.org/transeng.
